

Spatial Data Infrastructure – Asia and the Pacific (SDI-AP) is a free electronic newsletter from the [Global Spatial Data Infrastructure Association \(GSDI\)](#). The newsletter is produced for people interested in Spatial Data Infrastructure, GIS, remote sensing, and geospatial data issues in Asia and the Pacific. It aims to raise awareness and provide useful information to strengthen SDI initiatives and support the synchronisation of activities across the region. Support for the newsletter is also provided by the [Permanent Committee on Geographic Information for Asia and the Pacific \(PCGIAP\)](#), a regional forum to enhance cooperation in the development of a regional geographic information infrastructure. The newsletter is currently being produced for GSDI by the [Centre for Spatial Data Infrastructures and Land Administration](#) at the University of Melbourne.

To [subscribe](#) to SDI-AP. Back issues of the newsletter are at the [GSDI website](#). You can also sign up for [GSDI News List](#) to receive alerts of special news and announcements as well as notification of new issues of the SDI-AP newsletter. To subscribe to, and access archives of, thematic or regional discussion lists [please visit](#).

## Message from the editor

Welcome to the June edition of the newsletter.

This month the SDI spotlight highlights the progress made in the development of the Abu Dhabi SDI. The article focuses on the importance of egovernance and the development of a geoportal to facilitate access and data sharing across the region.

Of special note this month is the GSDI Conference being held in Rotterdam, the Netherlands (15<sup>th</sup>-19<sup>th</sup> of June). The theme for this conference is **Spatial Data Infrastructure Convergence: Building SDI Bridges to Address Global Challenges**. The next edition of the SDI-AP Newsletter will present the highlights from the conference.

If you have news or information related to SDI, GIS, RS or spatial data that you would like to share with the community (e.g. workshop announcements, publications, reports, websites of interest etc.), [kindly send us the materials by the 25<sup>th</sup> of the each month](#) for your contribution to be included in the next newsletter.

Malcolm Park and Serryn Eagleson ([Editors](#)), at the [Centre for Spatial Data Infrastructures and Land Administration](#), The University of Melbourne.

[Back to contents](#)

## Contributions

Thank you to the following people and organisations for their contributions to this issue:

Paul Box, Kate Lance, and Baek Wonkug for news feeds, the staff of the Ministry of the Interior, Taiwan for the Chinese translation, and Shivani Lal, *GIS Development, Asia Surveying Mapping Magazine* for directly feeding into the newsletter and in particular Rafic Naamani of ADSIC (UAE) & Mark Sorensen of GPCI (UAE) for providing this weeks SDI Spotlight.

## SDI News, Links, Papers, Presentations

### **[A new way of looking at NSW - Spatial Information eXchange](#)**

The Spatial Information eXchange (SIX) is the official source of NSW's geospatial information, possessing the most comprehensive, accurate and reliable spatial data for the State. At this [website](#) you can view, search, explore, connect and find out about anything to do with spatial data and NSW.

Source: [New South Wales Government](#)

### **[SDI Cookbook Wiki](#)**

"The Global Spatial Data Infrastructure Association (GSDI) has published the GSDI Cookbook in a wiki environment and would like to invite contributions to this resource from a broad community of geographic data providers and users. The GSDI Cookbook wiki provides the necessary background information to evaluate and implement existing components of SDI. The GSDI Cookbook including topics on data development, visualization, discovery, standards, legal and economic issues, community building, and case studies. To contribute to the Wiki follow this [link](#).

### **[Predicting and Tracking the Swine Flu Virus](#)**

Spatial Data is providing a valuable tool for tracking the spread of disease outbreaks such as the Swine Flu H1N1 virus. A number of agencies and organizations have been actively involved in the mapping of this virus. For example:

[HealthMap](#) allows you to select various sources of information independently, to select various diseases, categories such as "new and ongoing outbreaks" and "international significance" and specific warnings.

[MapCruzin.com](#) is maintaining an archive of H1N1 ArcGIS shapefiles and Excel spreadsheets so that users can track swine flu occurrences over time. Included in the data are confirmed cases, suspected cases, fatalities and documentation. The site also includes [free software](#) and a tutorial to view the shapefile maps.

## SDI Spotlight

This month the SDI spotlight is the Abu Dhabi SDI provided by Rafic Naamani of ADSIC (UAE) & Mark Sorensen of GPCI (UAE).

**Sample of Large Scale Basemap**

### [Abu Dhabi SDI Supports Wide-Ranging E-government Programs](#)

As part of Abu Dhabi's ambitious e-government program, the Abu Dhabi Spatial Data Infrastructure (Abu Dhabi SDI) is an initiative administered within the Abu Dhabi Systems and Information Centre (ADSIC) to facilitate the sharing of geospatial data among government agencies and other stakeholders.

Abu Dhabi SDI is empowering government and society with convenient, open access to high-quality and up-to-date geographic information and spatially enabled e-government services.

In Abu Dhabi, government entities have invested heavily in GIS technology and geospatial data to meet their own organizational needs. The emirate is now in an excellent position to leverage that investment by establishing the necessary framework of policies, partnerships, standards, data, procedures, technology, and

institutional capabilities that are needed to support more effective sharing and utilization of geospatial information. Abu Dhabi SDI has been conceived to provide that framework.

[Back to contents](#)

Now in the second stage of a three-stage process, the initiative has 25 government and quasi-government entities involved, with another 15 expected to join before the end of the year. As part of the community development, ADSIC is in the process of developing service-level agreements and licensing arrangements with each entity that spell out what data will be provided, the timing of periodic updates, and access and use restrictions for the data each is providing. In addition, a legal expert has been engaged to work on strengthening aspects of the legal framework to address issues that have special relevance to geospatial matters such as security, privacy, and intellectual property rights.

**3D Extruded view of Abu Dhabi City**

### **Geoportal Key to Abu Dhabi SDI Success**

The ultimate goal of the Abu Dhabi SDI initiative is to create a seamless network of interoperable nodes—geospatial portals—that will provide easy access to all geospatial information in the emirate. Currently, both secure government and publicly accessible geoportals have been set up, and the information available is being expanded and updated on an ongoing basis.

**Emirates Palace Hotel, Abu Dhabi**

The Abu Dhabi SDI geoportal provides access to the data clearinghouse from which more than 350 map services are being made available to the community. Data is now being kept current as the custodian entities periodically submit updates to the ADSIC team, which runs the data through procedures to ensure that the new information is consistent with the agreed standards. The geoportal is being used as a common reference for viewing existing data, and a few users are now employing thick-client access to map services published either as ArcIMS image services or Web Map Services (WMS). Several common spatial data engine applications (mobile mapping, area of interest locator, routing, geocoding, etc.) will soon be implemented that can be used by any e-government applications.

Many organizations in the Abu Dhabi SDI community have implemented or are planning to implement their own geoportal nodes. The Environment Agency—Abu Dhabi (EAD) has been operating its node for over two years, and other entities, such as the Department of Municipal Affairs (DMA), the Urban Planning Council (UPC), and the Abu Dhabi Water and Electricity Authority (ADWEA), have instituted or are planning to institute their own Web-based mapping services for internal and public use.

The implementation of these portals will lead to a greater sharing and utilization of spatial data in Abu Dhabi. Each organization is responsible for identifying individuals to be provided with access to the central geoportal, and these are approved and added by ADSIC. The participating organizations are now routinely adding new users as more people become aware of what is available and how it can be used in their work.

### [UTM to develop flood warning system using GIS](#)

Universiti Teknologi Malaysia (UTM, Kuala Lumpur) will soon develop a flood early warning system for major towns to help overcome traffic congestion after a heavy rain. Vice Chancellor Datuk Prof Dr Ir Zaini Ujang said that through the system, road users would be informed much early of the possibility of floods and indirectly this would allow them to find alternative routes to avoid being caught in traffic jams.

"Floods in Kuala Lumpur is seasonal and for that, we will use the existing system including remote sensing and GIS to trace rain and rainfall in particular areas. "The system will be developed by the UTM Associated Research Group in collaboration with University of Oxford," he told a press conference.

Source: [Bernama.com](#) and [GIS News](#)

[News & Reports from the recent GITA 2009 Conference](#) (April 19-22) can be accessed [here](#)

### [Google Maps Malaysia](#)

Google has launched Google Maps Malaysia. The site at [www.maps.google.com.my](http://www.maps.google.com.my) includes street level data and directory listings, but not Street View. It also allows local companies to add any information they choose for free. The map data has been supplied by AND Navigation, Europa Technologies, MapIT and Tele Atlas.

Source: Asian Surveying & Mapping Magazine

### [Curtin University GNSS Research Group](#)

Curtin University of Technology in Perth will establish a research group into future navigation satellites. The group's research program aims at developing theory, models and methods to ensure the best results. The timing is significant. Industry groups across the country are calling for the creation of a nationwide network of reference stations.

### [GIS map to identify vulnerable polling booths in India election](#)

Even as police launched a massive crackdown on anti-social elements in the run-up to the Lok Sabha elections, the Nadia district administration, perhaps for the first time, has come up with a GIS map to identify vulnerable areas and sensitive booths in both the Krishnagar and Ranaghat constituencies.

### **[New version of CatMDEdit now available](#)**

CatMDEdit 4.5 has been uploaded to [the open source project web site](#). CatMDEdit is a metadata editor tool that facilitates the documentation of resources, with special focus on the description of geographic information resources.

The new features provided by version 4.5 are:

- Graphical definition of geographic extent by means of a polygon.
- Geographic display of resources on a map.
- Integration of a tool that enables the creation of feature catalogues following the ISO 19110 specification.
- Export of a metadata repository in a geoRSS file.
- Connection to gvSIG in order to open the resources documented previously with CatMDEdit.
- Improvement of application usability and user interface.

### **New mosaics of Moscow on open access**

Yandex.Maps geo-service, having the most complete map of Russia on the Internet, now offers a new mosaic of satellite images for the territory of Moscow and nearest Moscow Region with an option to display a hybrid layer of satellite images and maps. ScanEx Center specialists prepared a mosaic based on QuickBird (0.6 m resolution) and IKONOS (0.8 m resolution) images of 2008. The unique experience of combining two types of satellite data enabled to cover the area of over 10 000 square km with highly-detailed images in one season. Now Yandex.Maps web-service has the most updated and detailed satellite-based mosaics of the Russian capital among similar geo-services.

### **Novelist uses satellite maps to research locale**

As a reality-based novelist, I have found that visiting my settings is critical to accurately writing about them. In most cases, I've been physically able to walk the areas I've described, but there are times when I must resort to other means. One of those involves using satellite imagery through the Internet. Here, a variety of mapping web sites allow me to zoom in on specific locations using a full range of magnification. Other than actually visiting the site, there isn't a better way to create or verify a potential scene.

### **Uganda wetland maps will help boost economy**

Uganda's leaders now have access to maps that will allow them to reduce poverty through better management of the country's wetlands.

Source: GIS Development

### **Sea-Floor Snaps Offer Clue to Sea-level Rise**

New, detailed images of the sea floor off the west coast of Antarctica are helping researchers to predict how the continent's ice sheet might respond to future warming. The images suggest that the mechanisms regulating the flow of ice into the sea may more complex than previously thought. The continent of Antarctica is swathed in an immense layer of ice up to 5,000 metres thick. Over time, the ice moves towards the sea, where it breaks away in the form of icebergs and eventually melts. Because it lies on rock that is above sea level, the ice sheet covering the eastern half of the continent is fairly stable. In contrast, the West Antarctic Ice Sheet (WAIS) lies on rock that is below sea level, making it much less stable.

Source: V1 Media

### **New UK street database to prevent satnav errors**

A new national street database providing details of low bridges, narrow roads and other restrictions could help to reduce satellite navigation errors. The National Street Gazetteer (NSG) lists over one million UK streets and is already widely used to help coordinate road works across England and Wales. It has been updated to a new format that enables highway authorities to record heights, weights and width restrictions and directions against individual roads and streets.

...

Significantly the ability to record heights, weights, width restrictions relating to weak bridges, low bridges or simply streets not wide enough for HGVs, now makes the NSG particularly useful to emergency services, transport firms and satellite navigation companies.

### **A landslide potentiality mapping on Mauritius Island** by Rody NIGEL & Soonil D.D.V. Rughooputh

#### **Abstract**

A landslide potentiality assessment method that is based on a factorial indexing system has been created and tested for Mauritius Island. The assessment aims at finding lands that can potentially slide by making use of an equation that has as input five parameters decisive for potential landslide namely; rainfall amount, terrain slope angle, permeability of geology strata, soil and land cover type. The equation output are indexes ranging from 1 to 10 such that 1 is associated with the lowest risk and 10 with the highest risk of potential landslide. A region that has not been assigned an index have no risk of land sliding there even though that region might be vulnerable to sliding lands from uphill. Results show that the method succeeds in mapping land that can potentiality slide and in evaluating the corresponding regions that are at risk from the latter.

[Fundamentals of Crime Mapping: Principles and Practice](#) introduces the topic of crime mapping and the history of GIS in law enforcement. This valuable text includes a workbook for hands-on instruction. Special topics discussed include: an up-to-date discussion of the current crime trends in rural and urban areas, the major ecological theories of crime, the notion of geographic profiling, empirical research using crime mapping tools, basic mapping terminology, and more! From Jones & Bartlett Publishers, 2009.

### [Geographic Information Systems: Webster's Timeline History, 1920 - 2007](#)

Webster's bibliographic and event-based timelines are comprehensive in scope, covering virtually all topics, geographic locations and people. They do so from a linguistic point of view, and in the case of this book, the focus is on "Geographic Information Systems," including when used in literature (e.g. all authors that might have Geographic Information Systems in their name). As such, this book represents the largest compilation of timeline events associated with Geographic Information Systems when it is used in proper noun form. Webster's timelines cover bibliographic citations, patented inventions, as well as non-conventional and alternative meanings which capture ambiguities in usage. From ICON Group International, Inc., 2009.

### [Map Addict](#)

'My name is Mike and I am a map addict. There, it's said!' Maps not only show the world, they help it turn. On an average day, we will consult some form of map approximately a dozen times, often without even noticing: checking the A-Z, the road atlas or the Sat Nav, scanning the tube or bus map, a quick Google online or hours wasted flying over a virtual Earth, navigating a way around a shopping centre, watching the weather forecast, planning a walk or a trip, catching up on the news, booking a holiday or hotel. Maps pepper logos, advertisements, illustrations, books, web pages and newspaper and magazine articles: they are a cipher for every area of human existence. At a stroke, they convey precise information about topography, layout, history, politics and power. They are the unsung heroes of life: *Map Addict* sings their song. There are some fine, dry tomes out there about the history and development of cartography: this is not one of them. *Map Addict* mixes wry observation with hard fact and considerable research, unearthing the offbeat, the unusual and the downright pedantic in a celebration of all things maps. From Collins, 2009.

**Map Use** is about reading maps. The book is oriented toward helping people to understand how maps work and can be used to communicate. Where other cartographic books often describe techniques alone, this book provides explanations on how different map techniques are being used. That process ensures that readers

[Back to contents](#)

begin to think not only about creating maps, but what a map can be used for and how it can help other people to understand. V1 Magazine editor [Jeff Thurston reviews the book](#) and provides a summary.

**Map Use: Reading and Analysis**, 6th Edition, by A. Jon Kimerling, Aileen R. Buckley, Phillip C. Muehrcke, & Juliana O. Muehrcke, ESRI Press, 568 pages; 2009, ISBN: 978 - 1589481909

[**Editor's note:** *GIS Development Weekly* (May 11) has [an editorial comment](#) on this news item.]

### **There's a whole wide world out there still waiting to be explored: Geographers who concentrate on research and freeze out big expeditions are missing out on a golden age of discovery**

Are there still unknown corners of this world to be discovered? Is there any purpose to sending out large-scale expeditions to explore far-flung places?

The answers to these questions have split the Royal Geographical Society (RGS) into two warring camps - "explorers" and "academics". The academics distrust the explorers - a near-swear-word in their lexicon - as grandstanding exhibitionists, always searching for the media spotlight. The explorers accuse their opponents of wanting to freeze out those who are not university-tenured geographers and further their own narrow academic careers.

Source: From [The Times Online](#), May 20, 2009

### **Major League Baseball Geolocation Patent**

That's right, Major League Baseball Advanced Media now has a patent related to geolocation. It's a process designed to ensure that those in the "wrong" geographies can't gain access to online video, but may also apply to other "rules based events." The patent and its use raise a number of interesting possibilities.

## Training Opportunities

### Spatial Data Infrastructure

GIS Training, 21<sup>st</sup> - 24th June, Dubai, United Arab Emirates

Spatial Data Infrastructure (SDI) is a web of interconnected, spatially based information that allows for the development of a common, spatially based operating picture (map) for use by contributing partners, and, often with restriction, business entities and the public.

While data itself is of prominent concern, many attempts to develop SDI are hampered by troubled planning, management, and systems design strategies. This course will use case studies and hands on exercises about planning and implementing SDI.

Specific topics covered will include needs assessment, implementation planning, theoretical data model development, logical data model development, usage implementation, how to conduct a successful pilot project, data capture and documentation, and systems architecture design considerations. Emphasis will be placed on developing SDI using a consensus and standards based approach that maximizes participation and return on investment while minimizing risk and tackling important policy considerations.

Further information including registration details [are available](#)

### Spatial Analysis: New Online Training Courses

#### Creating and Analyzing Surfaces Using ArcGIS Spatial Analyst

June 2, 2009

8:30 a.m.- 4:30 p.m. Pacific Time

In this course, you will use ArcGIS Spatial Analyst to model a variety of real-world scenarios for more informed decision making. You will work specifically with elevation rasters and other data to model surfaces, evaluate results, and create a variety of maps.

#### Geoprocessing Raster Data Using ArcGIS Spatial Analyst

June 4, 2009

8:30 a.m.-4:30 p.m. Pacific Time

In this course, you will examine suitability modeling techniques using raster data. You will learn to classify, weight, and combine data to identify sites suitable for a specific use. In course exercises, you will work with ModelBuilder to implement a suitability modeling workflow.

Further information on these two training courses is available from [GIS and Science](#)

### Upcoming ITC Refresher Courses

[Designing and Utilizing geoinformation infrastructure for effective electronic governance in Eastern Africa](#), Uganda, starting 12 October 2009 (two weeks). The course will take place prior to the [Africa GIS 2009 conference](#). Priority will be given to applicants with accepted abstracts to the Africa GIS conference (Note: deadline for abstracts extended to May 30, 2009). A number of fellowships are available for eligible candidates. **Application deadline: June 15, 2009.**

[Targeting Urban Poverty Alleviation](#), Ethiopia, starting 14 September 2009 (2 weeks). A number of NFP fellowships are available for eligible candidates. **Application deadline: July 1, 2009.**

[Use of low cost earth observation data in environmental and climate monitoring applications: taking further the African Union - AMESD initiative](#), Rwanda, starting 5 October 2009 (2 weeks). A number of fellowships are available for eligible candidates. **Application deadline: August 20, 2009.**

### Geospatial Sciences RMIT Mid-Year intake

Research based, the two year full time (four year part time) Master of Applied Science and four year full time (eight years part time) Doctor of Philosophy (PhD) cover a wide range of areas. The programs include surveying, multimedia cartography, satellite positioning, land and geographic information systems (LIS/GIS), photogrammetry, remote sensing, sustainable development and resource management.

Source: RMIT

[Back to contents](#)

### [SLA First Scholarship](#)

Singapore Land Authority, the island's national mapping authority, plans to give scholarships to undergraduates who want to pursue geospatial science and technology-related disciplines. The scholarships will be available for study in both Singapore or overseas. SLA is also working with secondary school students to make them more aware of geospatial technology.

Source: Asia Surveying Magazine

### [Fourth International Workshop on "Geographical Analysis, Urban Modeling, Spatial Statistics" \(GEOG-AN-MOD 09\)](#)

<http://www.lisut.org/workshop/GEOG-AN-MOD09/> in conjunction with

[The 2009 International Conference on Computational Science and its Applications \(ICCSA 2009\)](#)

**"NEW"** June 29th to July 2nd, 2009

Kyung Hee University-Global Campus, Yongin (Korea)

#### **Important dates**

**June 29 - July 2, 2009:** ICCSA 2009 Conference.

### [Association of American Geographers offers membership at reduced rate for eligible professionals](#)

Geographers and others whose work involves Spatial Data Infrastructure, GIS, remote sensing, and geospatial data issues in Asia and the Pacific may be eligible to join the Association of American Geographers (AAG) for \$20 per year. This new reduced dues rate is open to professionals who earn less than US\$25,000 per year and are both citizens of and residents in certain countries throughout Asia and the Pacific. [A full list of these countries is available.](#)

The AAG developing regions membership category offers all regular AAG member benefits, with the exception that publications are provided only in digital format.

For more [information on this membership program](#), or [contact Matthew Hamilton](#).

For more information on the [Association of American Geographers](#).

### [Advanced Training in Remote Sensing & GIS](#)

**Inter-Islamic Networks on Space Sciences and Technology (ISNET)** is an inter-state, non political and non profit making agency. It is an independent, autonomous and self governing institution under the umbrella of the OIC (Organisation of Islamic Conference) Standing Committee on Scientific and Technological Cooperation (COMSTECH). SUPARCO is the host organisation of ISNET.

Institute: National Center for Remote Sensing and Geo-Informatics (NCRG), Karachi, Pakistan

[Application deadline & Form:](#) 1 June 2009

Starting Date: 13 July 2009 (2 weeks)

The course aims at providing knowledge and skills in state-of-the-art remote sensing technologies and their applications. It will also focus on concepts of digital image processing techniques, development of image processing algorithms to achieve various image processing tasks. It will also attempt to explore functionalities of various off-the-shelf commercial systems and their comparison. Hands-on training will be imparted to develop practical skills in image processing. The course will touch upon latest developments in remote sensing both in space and ground segments.

ISNET will sponsor participants on the basis of evaluation of the course organising committee and also consider the criteria of first come first served basis. Usually only 4-5 participants can be accommodated in each Course.

Sponsorship for workshop will depend on the availability of sponsorship funds for that particular workshop.

Thanks to Kate Lance for bringing this to our attention.

### [United Nations University – ITC - School for Disaster Geo-information Management](#) **Capacity Building for Disaster Geo-Information Management**

Worldwide we are faced with a rapidly growing impact of disasters, due to increased vulnerability and climatic extremes. There is an urgent need to include the concepts of disaster risk management into planning, sustainable development and environmental impact assessment. The evaluation of the expected losses due to hazardous events requires a spatial analysis, as all components differ in space and time, using tools that handle spatial

information, such as geographic information systems (GIS).

One of the important requirements to carry out an effective disaster risk management is capacity building and training of disaster management experts and professionals.

For 2009 the following courses are scheduled:

[Back to contents](#)

§ [Short course GIS for Disaster Risk Management](#)

In collaboration with: Asian Disaster Preparedness Center (ADPC) and Geoinformatics Center of the Asian Institute of Technology (AIT), Thailand;

§ [Distance Education course Multi-Hazard Risk Assessment](#)

§ [Master of Science degree course in Geo-information for Spatial Planning and Risk Management](#), with the University Gadjah Mada, Indonesia

§ [MSc and Postgraduate diploma course in Applied Earth Sciences](#) – Geo-hazards stream

§ [MSc and Postgraduate diploma course in Geo-hazards](#), with IIRS, Dehra Dun, India.

For more information go to [Website](#).

## [Workshop on quality, scale and analysis aspects of city models](#)

Lund, Sweden, December 3-4, 2009

### Topics

- Multiple representation modelling, storage and analysis of city models
- Integration of 2d and/or 3d-models, as well as image data
- Quality-based generalization: control and evaluation
- Semantic generalization of data models
- Understanding uncertainties in spatial data
- Presentation of quality information by metadata in GIS
- Use of images in quality assurance
- Spatial reasoning process
- Quality of spatio-temporal data and models in urban environment
- All other topics that relates to the theme and the urban context

### Important dates

30 June 2009: submission of extended abstracts.

31 August 2009: Notification of acceptance.

1 October 2009: Last day for registration.

1 November: Submission of full papers.

3-4 December: Workshop.

### Submission guidelines

Papers must be written in English and must be formatted strictly according to the [ISPRS guidelines](#). The maximum length of the extended abstract is restricted to 5 pages, including all figures and references. The submission of papers is in ms-word format only.

### Publications

All accepted full papers will be published on a workshop CD.

Selected papers will be reviewed for publication in a special issue of ISPRS journal, which is planned to be published in early 2011.

### [Workshop website](#)

At this website you can register and submit abstract/papers. [Questions](#)

### About Lund

Lund is an old city in Southern Sweden. The city is believed to have been founded around 990, when the Scanian lands belonged to Denmark. It soon became the Christian center of Northern Europe with an archbishop and with the towering Lund Cathedral, built in 1103.

The atmosphere of Lund is much formed by Lund University, one of the largest universities in Scandinavia. Lund University, established in 1666, has around 42,000 full or part-time students. As late as the 1940s, Lund was a relatively small city with few large-scale industries, covering only about a fourth of the current urban area and was dominated by the cathedral and the university. Since then, the student population has increased about twelvefold, many industrial companies in the chemical, medical or electronics branches and, more recently, within information management, have set up establishments in the city, and the town's population, architecture and pulse has been transformed.

### [Intergraph Opens Nominations for 2009 Carl Pulfrich Award](#)

#### **Award to Honor Outstanding Achievement in Photogrammetry, Remote Sensing and Earth Imaging**

Intergraph is now accepting nominations for its biennial Carl Pulfrich Award to recognize significant design and manufacturing contributions to the industries of photogrammetry, remote sensing and earth imaging. The award is dedicated to honorees in memory of Dr. Carl Pulfrich, a key member of the scientific team at Carl Zeiss, Inc., who from 1890 to 1927 oversaw the design of the company's first stereo photogrammetric and surveying instruments. Carl Zeiss, Inc. later teamed with Intergraph to create Intergraph's Z/I Imaging photogrammetry division.

Professionals in the photogrammetry, remote sensing and earth imaging industries may nominate candidates for the Carl Pulfrich Award, which will be presented during the 52nd annual Photogrammetric Week, Sept. 7-11, 2009, in Stuttgart, Germany. The recipient will be granted a monetary reward of up to \$7,500.

"Intergraph has been presenting the Carl Pulfrich award to deserving earth imaging and remote sensing experts since 2001," said Dr. Mostafa Madani, chief photogrammetrist at Intergraph and chairman of the Carl Pulfrich Award Council. "We are thankful to be able to continue offering the award this year. It is very motivating for Intergraph and our peers in the community to simultaneously honor the memory of a true earth imaging pioneer while recognizing the top contributors of this generation."

Nominations for the Carl Pulfrich Award must be received by 5 p.m. (CST) on July 1, 2009. For more detailed information on nomination guidelines and procedures, [please visit](#) .

### [Travel Grant Opportunity to attend AfricaGIS 2009](#)

The ISPRS Foundation is seeking applications from individuals wishing to obtain travel assistance from the "Trust Fund Amsterdam 2000" (administered by the ISPRS Foundation) to participate in [the AfricaGIS International Conference](#), which will be held in Kampala, Uganda, from 26 to 30 October 2009

**Deadline for receipt of applications: 10 July 2009.** Applicants should read [the preamble and complete the application form](#) which can be downloaded from [the ISPRS website](#).

Thanks to KL for this announcement.

### [UN photo contest zooms in on drylands](#)

As part of an ongoing effort to raise awareness about the urgent need for action against desertification and land degradation, the UN is calling on all aspiring photographers to participate in its second international photo contest.

[Back to contents](#)

The UN Convention to Combat Desertification (UNCCD) is looking for images that artistically highlight either the efforts of people trying to conserve soil, land or water in drylands or the relationship between people and dryland ecosystems.

**20 student bursaries (each worth £ 120) for high quality MSc/PhD students submitting papers to LBS 2009** to help cover their registration fees for LBS 2009 conference (2-4 September). These bursaries are sponsored by University of Nottingham Horizon Digital Economy Research Hub and Horizon Doctoral Training Centre. [More details](#).

**Eligibility Criteria:**

# You are currently student in a Masters or PhD program

# You are an author of a full paper/extended abstract that has been accepted for presentation at the LBS 2009. Please mention that you wish to be considered for Horizon student bursary when you submit your paper.

**Horizon Doctoral Student Colloquium**

The LBS 2009 committee is pleased to announce a Doctoral Student Colloquium for this year's LBS conference. The Colloquium will provide doctoral students with the opportunity to present their work to senior faculty in a setting that is relatively informal but that allows for maximum intellectual exchange. Students will receive feedback on their presentation and/or current research from participating faculty and from students' peers.

**More info on Horizon:**

The Horizon Digital Economy Research Hub centre is a new £12 million research centre at The University of Nottingham to develop digital technology to transform modern living. This builds on the success of the £ 5.7 million Horizon Doctoral Training Centre in Location-aware Pervasive Computing at the University of Nottingham. The Centre for Geospatial Science is part of both Horizon Digital Economy Research Hub centre and Horizon Doctoral Training Centre.

Please contact me for any information needed.

**PhD Studentships**

Broaden your horizon: the Nottingham Doctoral Training Centre in Location-Aware Ubiquitous Computing for the Digital Economy

Location-aware Ubiquitous Computing, which takes advantage of knowing the geographical position of the millions of fixed and mobile computing and communications devices embedded into the world around us - is the most exciting and significant technology to emerge since the Internet. It promises to transform the ways in which we work, shop, travel, learn, socialise and play. Would you like to be at the heart of this revolution, exploring new uses of ubiquitous computing, creating new location-aware technologies, or studying their impact on people's lives?

This new Doctoral Training Centre at the University of Nottingham is recruiting on to a unique and major new PhD programme in Location-aware Ubiquitous Computing. Supported by EPSRC and over 30 industry partners, we are training a community of over 50 PhD students to become the next generation of research leaders in this field.

Students will benefit from:

- \* a fully-funded four-year PhD programme that integrates a leading-edge research project with research training in interdisciplinary skills
- \* a personalised pathway through this programme giving a balance of skills across key technology areas, future applications and human and societal issues
- \* training in innovation and ingenuity to equip students for careers in industry, from global companies to start-ups
- \* a three-month salaried internship at one of our partners which include the BBC, BT, EADS Astrium, HP, IBM, Logica, Microsoft, Network Rail, Nokia, Ordnance Survey, PARC, Scott Wilson and Thales (full list below)

[Back to contents](#)

- \* regular seminars and meetings with industry representatives to develop contacts with future employers
- \* an enhanced stipend of £15,000 per annum as well as a personal laptop
- \* supervision from international leaders in the field of Location-aware Ubiquitous Computing and associated disciplines
- \* use of multi-million pound state-of-the-art facilities including positioning and sensing test-beds and transport simulators
- \* career guidance support tailored to individual needs
- \* office and laboratory space on Nottingham's award-winning Jubilee Campus

Students from a wide variety of backgrounds including computer science, the geospatial sciences, engineering, psychology, sociology, business, social science and the arts are all invited to apply, but you must have an excellent first degree and be able to demonstrate an enthusiasm for interdisciplinary research. The full EPSRC funding is restricted to UK/home students but there is also one international studentship available.

Our current industry partners are: Active Ingredient, Aerial, BBC, Blast Theory, BT, EADS Astrium, EUROCONTROL, Fhios, Guidance Monitoring, HP, HW Communications, IBM, innovITS, Leica Geosystems, Location and Timing KTN, Logica, Microsoft, Network Rail, Nokia, Nottingham Scientific, Ordnance Survey, PARC, Scott Wilson, SERCO, Thales, Trinity House, TRL Technology.

Informal enquiries may be addressed to [Professor Mike Jackson](#) or [Dr H Glover](#), tel: 0115 846 6780

For an application form, please email [Samantha Stapleford](#), Nottingham, Jubilee Campus, Wollaton Road, Nottingham, NG8 1BB. Please quote ref.

**The closing date for this round of applications is Monday 15 June 2009.**

### **Scientific Capacity Building/Enhancement for Sustainable Development in Developing Countries** **Special call for proposals for a focused activity** from **Asia-Pacific Network for Global Change Research (APN)**

A limited amount of financial support\* is available for focussed activities that are undertaken at local, national or regional levels in Scientific Capacity Building for Climate Impact and Vulnerability Assessments.

1. The proposed activity must focus on scientific capacity building of developing nation(s) to conduct climate impact and vulnerability assessments.
2. The proposed activity must have high potential to provide positive outcomes for developing countries that could also be used by the international community.
3. The proponent's institution must be based in a developing member or approved country of the APN
4. The proponent and/or collaborators must possess the skills necessary to impart scientific capacity building in the focus area of climate impact and vulnerability assessments.
5. The proponent must inform his/her APN country nFP and SPG member (where one exists), in advance, of the intention to submit a proposal. Click here < <http://www.apn-gcr.org/en/aboutapn/whoswho.html> > to view the contact details of APN members.
6. The proposed activity must outline policy-relevant questions to be addressed and answered, organisational arrangements of the proposed activity and a publication and dissemination plan. In this respect, strong links with government units and/or agencies are expected.
7. The Expression of Interest must follow the template and be submitted to the [APN Secretariat](#) by Friday 5th June 2009.

## Employment Opportunities

**Spatial Jobs Online (Australia)** Because of tight application closing dates the editors provide these websites for employment seekers to access directly: < <http://www.spatialjobs.com.au/> > and < <http://www.GISjobs.com.au> >

### GIS Professionals – Vietnam

Geomatic Consulting International is an internationally managed survey and mapping company resident in Vietnam.

The company currently is seeking a number of GIS professionals for project work in Vietnam. Projects require both Vietnamese nationals as well as international Team Leaders and Specialists with the following capabilities and experience:

- o Training and education in the field of applying Geo-information techniques to earth sciences,
- o Qualifications in flood hydrology and river hydraulics, GIS/RS, hazard mapping,
- o GIS design and operation experience,
- o Ability to speak fluent English and prepare written reports in English,
- o Training experience.

Projects start in July and August, 2009 with specialist input periods ranging from 4 to 12 months. GCI invites interested experts to submit their CVs (in English) by [email to David Mitchell](mailto:David.Mitchell@GCI.com.au).

Geomatic Consulting International, Ho Chi Minh City, Vietnam

### Director of Land Survey and Management, RCMRD, Nairobi, Kenya

[Download Position Description](#)

Contract Duration: Three (3) years renewable three times.

Applicants for these positions must be nationals of the Centre's member States only.

Applications should be **submitted no later than 15 August**, 2009, addressed to:

Director General, RCMRD, P.O Box 632, 00618, Ruaraka, NAIROBI

Tel: +254 020 8560654/8561775/8560227/8560625; Fax: +254 020 8561673/8563767

[E-mail](#)

### [Rainforest Foundation UK is looking for a consultant to conduct the Final Evaluation for the project "Cartographie Communautaire de Populations Forestières" in Democratic Republic of Congo \(DRC\).](#)

For further information, contact: [Giulia Pedone](#), PhD; Programme Coordinator DRC, Rainforest Foundation UK

### Drive Geospatial information into the future

- Be at the cutting edge of geospatial information
- Fantastic opportunity to lead an all of government initiative
- Engage and influence at a senior level

This is a real opportunity to accelerate your career by taking a leadership role in driving forward New Zealand's Geospatial Strategy. Managing the NZ Geospatial Office, you will play a pivotal role in engaging at a senior level across the geospatial sector in determining, negotiating and delivering priorities.

Working at the cutting edge of geospatial information, you will advise and support the Geospatial Executives Group, Chair the Geospatial Steering Committee and oversee the multiple agency work programme for implementing the Geospatial Strategy. As part of LINZ's wider leadership team, you will provide a specialised geospatial focus to the development and implementation of LINZ's organisational strategy.

Critical to your success in this role will be your strong leadership skills and your proven ability to engage, influence and work across the government sector. You will be politically savvy, demonstrate strategic agility, have excellent interpersonal skills and the ability to inspire and motivate people towards a common vision.

To apply for this position please visit < <http://www.h2r.co.nz> > quoting vacancy number no 12908. For further information please contact Bronwyn Long or Leah Carter at H2R Consulting on 04 4999 471.

All applications will be acknowledged by email. Applications close Monday 8 June 2009.

## Conferences, Events

For upcoming events of global or major international interest, please visit the [upcoming conference list](#) on the GSDI website.

		Camera Ready Papers Due: 5 May 2009 Conference: 13-14 July 2009
<b>13-17 July</b>	San Diego, CA, USA	<a href="#">29<sup>th</sup> ESRI International User Conference</a> The deadline for abstract submissions has <b>CLOSED</b>
<b>13-17 July</b>	Cairns, Australia	<a href="#">18<sup>th</sup> IMACS WORLD CONGRESS</a> <a href="#">MODSIM09</a> International Congress on Modelling & Simulation "Interfacing Modelling and Simulation with Mathematical and Computational Sciences" Early Bird Registration closes Friday 13 March 2009 Submission and Acceptance of Abstracts has <b>CLOSED</b> Final papers submitted Friday 13 March 2009
<b>21-24 July</b>	Presidente Prudente, São Paulo, Brazil	<a href="#">6<sup>th</sup> International Symposium on Mobile Mapping Technology – MMT2009</a>
<b>24-6 July</b>	Hyderabad, India	<a href="#">3rd International Conference on HealthGIS 2009</a> <a href="#">Email</a> <a href="#">Call for papers</a> • Early Registration 19 th June 2009
<b>27 28 July</b> <b>"NEW"</b>	New Delhi, India	<a href="#">Geo Intelligence India</a> <a href="#">Email</a>
<b>July 27-31</b>	Vancouver, Canada	<a href="#">GeoWeb2009</a> GeoWeb 2009 organizers are currently seeking submissions for presentations and workshops. Details: All abstracts must be less than 200 words and be submitted via <a href="#">the online form</a> no later than February 27, 2009. For all questions regarding the submission of abstracts and agendas please <a href="#">contact Julie Eckhart</a> . Complete information on the call for papers process and conference may be obtained at <a href="http://www.geowebconference.org">http://www.geowebconference.org</a> .
<b>August 2009</b>		
<b>4 - 6 August</b> <b>"NEW"</b>	Fairbanks, Alaska	<a href="#">The GeoNorth 2009 conference</a> is a unique opportunity to discuss issues and present current research related to geospatial activities in the arctic environment. This conference provides an opportunity to present results associated with the International Polar Year (IPY), environment and climate change monitoring and geographic analysis, geospatial standards and their application, and the construction of virtual collaborative networks including Arctic mapping and the virtual Arctic Spatial Data Infrastructure (ASDI). The conference is coordinated by the USGS, the University of Alaska Fairbanks, and the IPY Program Committee. Sessions are planned for the following themes with a focus on the development, publication, and application of interdisciplinary data for analysis and re-use in the Arctic context: <ul style="list-style-type: none"> <li>* Societal, cultural, and indigenous mapping of local and traditional knowledge</li> <li>* Imagery, remote sensing, and sensor networks for the arctic landscape</li> <li>* Virtual globes, geo-browsers, and spatio-temporal data exploration</li> <li>* Ocean data access and analysis</li> <li>* Natural resource assessment in the Arctic</li> <li>* Understanding and assessing changes on land and ice</li> <li>* Climate and atmospheric data, trends, and analysis</li> <li>* Forum on arctic mapping and the Arctic Spatial Data Infrastructure</li> <li>* Geosphere and hydrosphere modeling</li> <li>* Understanding geospatial standards and their application</li> </ul>

		The following website includes information on the conference, the Call for Papers, and registration details. We look forward to your participation!
<b>4 - 7 August</b>	Bali - Indonesia	<a href="#">10th South East Asian Survey Congress (SEASC '09)</a> Hosted by <a href="#">Bakosurtanal</a> (Indonesia's land information agency) <a href="#">Contact</a> Website: < <a href="http://www.seasc2009.org/">http://www.seasc2009.org/</a> >
<b>3-14 August</b>	Rio de Janeiro, Brazil	<a href="#">XXVII General Assembly of the International Astronomical Union</a>
<b>7 – 8 August</b>	Darwin, Australia	<a href="#">2009 IMTA Asia Pacific Conference</a> <a href="#">Call for Papers</a> The International Map Trade Association is hosting an Asia Pacific conference and trade show. The theme is 'Connecting the Business of Maps in Australia's Top End'. The organisers have issued a call for presentations. Presentations may address any topic closely related to the geospatial industry. The deadline for applications is 24 April. <a href="#">International Map Trade Association</a> contact <a href="#">Damien Demaj</a>
<b>August 12-14, 2009</b>	Fairfax, Virginia, USA	<a href="#">The 17th International Conference of Geoinformatics (Geoinformatics 2009)</a> George Mason University,
<b>August 13-14</b>	Perth, Australia	<a href="#">2009 Australasian Mine Surveying Conference</a> The event will bring together mining industry surveyors and spatial professionals from Australia, South East Asia and the South Pacific. It is a joint venture between the Australian Institute of Mine Surveyors and the Spatial Sciences Institute. <a href="#">Email</a>
<b>August 16-19</b>	Hong Kong	<a href="#">10th Asian Urbanisation Conference</a> <a href="#">Email</a>

<b>“NEW”</b>		Nottingham, UK have a pleasure in inviting you to participate to the <a href="#">2nd GNSS Vulnerabilities and Solutions Conference</a> to be held on 2 - 5 September 2009 in Baška, Krk Island, Croatia. Extended abstracts should be submitted to <a href="#">Dr Renato Filjar</a> , FRIN by e-mail no later than 1 May, 2009. Final decision regarding the paper acceptance will be reached by 1 June, 2009, when the authors of accepted articles will be notified of abstract acceptance and kindly invited to submit their papers (up to 10 pages recommended, in the Journal of Navigation-style format) by 15 July, 2009.
<b>8 September</b> <b>“NEW”</b>	Jena, Germany	<a href="#">The workshop "Performance Evaluation of Pattern Recognition in Remote Sensing"</a> of the ISPRS Intercommission Working Group III/VII "Pattern Recognition in Remote Sensing" will be held in Jena, Germany, on 08th September 2009 in conjunction with the <a href="#">DAGM Symposium 2009</a> . Date for Submission of Papers – 1 June, 2009 Author notification – 20 July Camera ready manuscript – 3 August Workshop – 8 September
<b>8-10 September</b>  <b>“NEW”</b>	Tsukuba, Japan	<b>International Workshop on the Revision of Specifications for Global Map Version 2</b> The details will be informed on the <a href="#">ISCGM Website</a> as soon as determined.
<b>9-12 September</b>	Beijing, China	<a href="#">6th International Symposium on Digital Earth</a> <a href="#">E-mail</a> <b>The deadline</b> for abstract submissions for the 6th International Symposium on Digital Earth (9-12 September, Beijing) <b>has been extended to 30 April</b> Secretariat, The 6 <sup>th</sup> International Symposium on Digital Earth 14F, Kedian Tower, No.9 Beiyitiao Road, Zhongguancun, Beijing, 100190, China Tel: 86-10-58887298, Fax:86-10-58887406 <a href="#">Email for ISDE</a> <a href="#">ISDE WEBSITE</a>
<b>14-16 September</b>	Beijing	<a href="#">Emergency Management Conference</a> The international conference on <b>Geospatial Solutions for Emergency Management</b> (GSEM 2009) is being held in conjunction with the 50th anniversary of the Chinese Academy of Surveying and Mapping. The organisers are calling for papers on themes including data and image fusion, disaster management and new sensors. The deadline for abstracts is 31 March.
<b>16-18 September</b> <b>“NEW”</b>	Johannesburg, South Africa	<a href="#">Map Africa</a>  <a href="#">Email</a>
<b>21-25 September</b>	Venice, Italy	<a href="#">OceanObs '09</a>
<b>October 2009</b>		
<b>4-8 October,</b> <b>“NEW”</b>	Cleveland, Ohio, USA	<a href="#">NSGIC(National States Geographic Information Council) 2009 Annual Conference</a>
<b>5-7 October</b>	Westminster, Colorado	More information will be forthcoming but we ask you to "save the date" for the <a href="#">Location Intelligence Conference 2009</a> . We'll be at the Westin Westminster Hotel in Westminster, Colorado, just outside of Denver toward Boulder from Oct. 5-7
<b>7 - 9 October 2009</b>  <b>“NEW”</b>	Taipei, Taiwan	<a href="#">GIS in the Humanities and Social Sciences 2009 International Conference</a> . This significant international Geographical Information Science event aims to bring together an eclectic mix of humanists and social scientists who have used GIS in their work. With a view to the development of GIS as an effective tool and approach for

		disciplines in the humanities and social sciences, scholars considering using GIS and doctoral students are welcomed as well. <a href="#">Alternative URL</a> <b>Abstract deadline: June 15, 2009.</b>
12-16 October	Kuala Lumpur, Malaysia	<a href="#">FIG Commission 7 Annual Meeting and one-day International Symposium</a>
15 October 2009 <b>“NEW”</b>	Taichung, Taiwan	<a href="#">2009 Urban Geographical Information System Forum</a>  <a href="#">Contact</a>
19-22 October <b>“UPDATED”</b>	Hanoi, Vietnam	<a href="#">7th FIG Regional Conference</a> <i>awaiting Timeline for registration and submission of abstracts, papers, and presentations</i> <a href="#">Conference Website</a> <b>Electronic submission of papers by 10 June 2009</b>
20-23 October <b>“UPDATED”</b>	Sydney, Australia	<a href="#">FOSS4G 2009 Call for Abstracts</a> <a href="#">Email</a> The Organising Committee would like to welcome all interested participants to submit abstracts for presentations for the <a href="#">Free and Open Source Software for Geospatial conference (FOSS4G)</a> , being held in Sydney, Australia October 20-23. <a href="#">FOSS4G</a> offers participants an opportunity to learn from and share your knowledge, experience and ideas with a group of like minded individuals representing a wide array of industries, governments, technologies and nationalities. Presentations are open to all those interested and will comprise a 30 minute slot which includes hand-over, introductions and 5 minutes for questions. Presentations will be selected which have a strong "Open Geospatial" theme to them. The committee is looking for a mixture of technical and non-technical presentations. <a href="#">Email2</a> <b>The Academic community and FOSS4G organising committee are pleased to add an <a href="#">academic track to the FOSS4G conference</a>, and remind interested presenters that there are only two weeks left for FOSS4G abstract submissions! Abstract submission closes 8 June 2009. (Note the deadline has been extended a week.)</b> < <a href="http://2009.foss4g.org/presentations/">http://2009.foss4g.org/presentations/</a> > < <a href="http://wiki.osgeo.org/wiki/FOSS4G_2009_Press_Release_14">http://wiki.osgeo.org/wiki/FOSS4G_2009_Press_Release_14</a> >
25 October <b>“NEW”</b>	Bangkok, Thailand	<a href="#">16th Meeting of ISCGM (International Steering Committee for Global Mapping)</a>
26-30 October <b>“NEW”</b>	Bangkok, Thailand	<a href="#">18th UNRCC AP/15th PCGIAP Meeting</a>
26-29 October	Kampala Uganda	<a href="#">AFRICAGIS 2009; International Conference</a> Theme of the conference “GEO-SPATIAL INFORMATION AND SUSTAINABLE DEVELOPMENT IN AFRICA; FACING CHALLENGES OF GLOBAL CHANGE”
<b>November 2009</b>		
10-12 November	St Petersburg, Florida, USA	<a href="#">Fifth National GIS in Transit Conference</a> This biennial conference will focus on the growing role of GIS in supporting planning, service delivery, and decision making in public transit. The Programme Committee will organise an educational programme based upon the abstracts submitted through the Call for Participation. All abstract submissions, received by February 27, 2009, will be reviewed and considered for this conference. The Program Committee encourages abstract submissions in one or more of these four general categories - Applications, Tools, Data, and Management & Policy. Website: <a href="http://www.urisa.org/gis_transit">http://www.urisa.org/gis_transit</a>

<b>15-22 November</b>	Santiago, Chile	<a href="#">XXIV International Cartographic Conference</a> <a href="#">First call for papers</a> <b>Deadline for Abstracts:</b> 16 January, 2009
<b>16 – 19 November</b>	San Antonio, Texas, USA	<a href="#">ASPRS / MAPPS 2009 Fall Conference</a>
<b>17-20 November</b>	Denver, USA	<a href="#">7th William T. Pecora Memorial Remote Sensing Symposium</a> <a href="#">E-mail</a>
<b>30 November - 2 December</b>	Sydney, Australia (Univ NSW)	<b>GeoComputation 2009</b> <b>Call for Papers</b> <a href="#">The 10th International Conference on GeoComputation</a> Contributors are invited to submit extended abstracts, which will be reviewed for inclusion in the conference program. The abstracts should be sent as either Word documents or pdf files to <a href="mailto:geocomputation@unsw.edu.au">geocomputation@unsw.edu.au</a> Files larger than 1Mb should be sent as zipped archives. The submission deadline is <b>30 June 2009</b> . Authors will be notified of acceptance/rejection in the end of August 2009. Any questions regarding the submission and publication process should be addressed to <a href="mailto:geocomputation@unsw.edu.au">geocomputation@unsw.edu.au</a>
<b>December 2009</b>		
<b>1 – 3 December</b>	Gold Coast, Australia	Organisers of the <a href="#">International Global Navigation Satellite Systems Society's (IGNSS) 2009</a> symposium and exhibition (1-3 December, Gold Coast, Australia) are calling for papers. Abstracts should be submitted by 17 July 2009. The Society will present three award plaques on the last day of the symposium for the best papers and exhibition booth. <a href="#">IGNSS 2009</a>
<b>1 – 3 December</b>	Moscow, Russia	<a href="#">Scanex 4th International Conference "Earth from Digital Space – the most effective solutions"</a> <a href="#">Email</a>
